About IDROMECS P.A.

Idromec S.p.A. was founded in 1969 by Luigi and Olivo Tabarelli. In July 75 the first shaped box baler (curved/flat lids) was built and then patented. This innovative system of scrap compacting combines a large volume of loaded material with a simple and effective compression with only two movements. Now a large range of up-to-date shear-balers and balers makes Idromec one of the major players on the market.

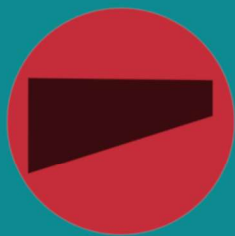

Quality components

Rexroth - Parker

Siemens

Hardox

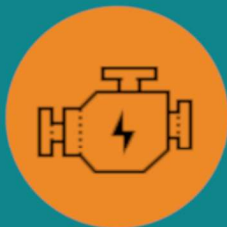

Cummins

**SHEAR
FORCE**

1000t

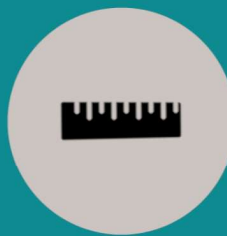

SHEAR THROAT
900 X 700

POWER

3x90kW

ALTERNATIVELY
4 X 90 Kw

BOX

9MT

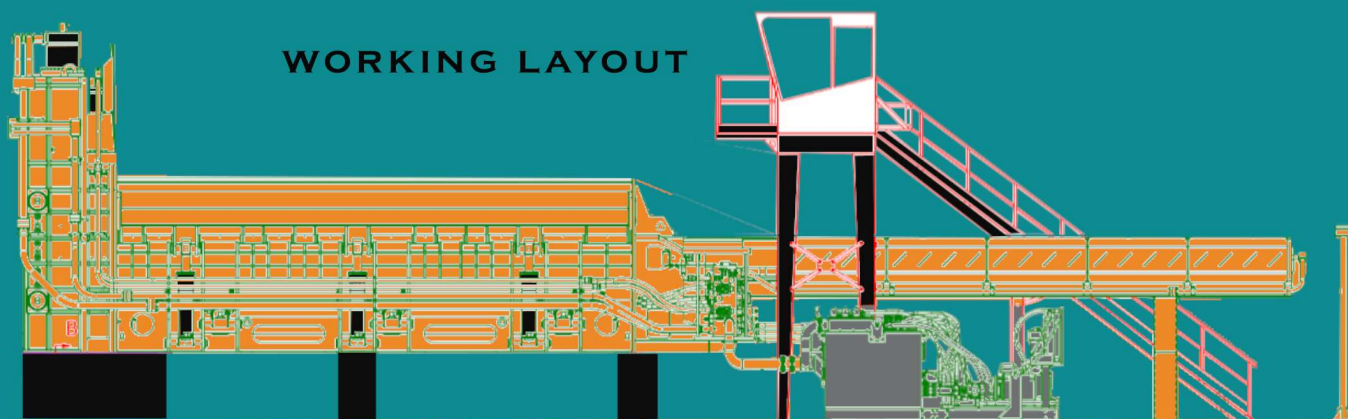

BOX LINERS IN
HARDOX 400

WEIGHT

155t

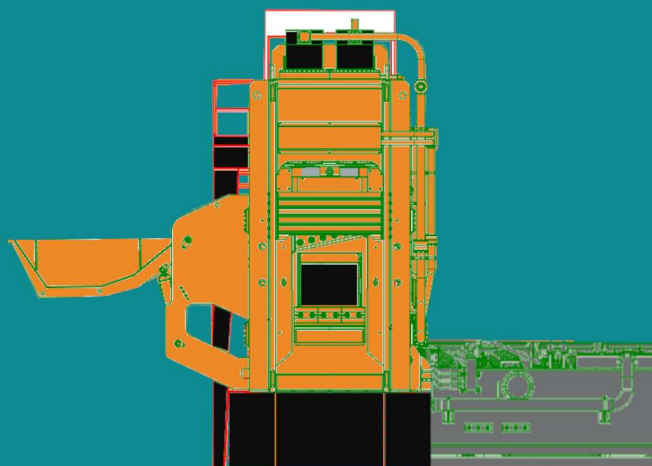

WORKING LAYOUT

OVERALL LENGTH: 24000 MM

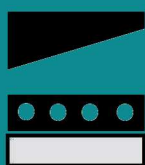

OVERALL WIDTH: 9000 MM

OVERALL HEIGHT: 6800 MM

MODEM

remote
diagnostics

BLADE SEAT

threaded and
replaceable
in TOOLOX

AUTOLUBE

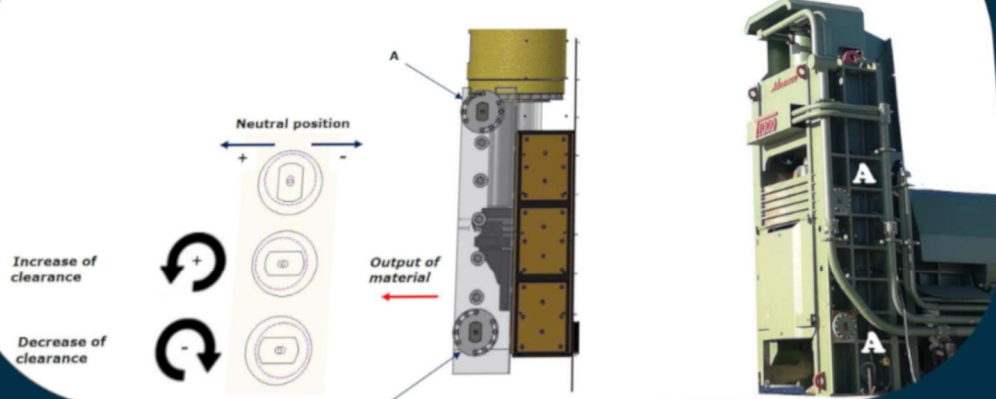

of the shear
and (optionally)
the box
